## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 30-36, 42, 43 and 46-50 drawn to electronic system modules, classified in class 257, subclass 700+.
- II. Claims 19-29, 37-41, 44 and 45, drawn to methods of fabrication, classified in class 438, subclass 400+.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Group I assemblies are used to fabricate an interconnect circuit however, the different methods of Group II may provide a rigid layer to place a dielectric on while another method may define the layer to be smooth and still perform the process of fabricating an electronic system.
